

KEVIN RIO HARRISTYANDO
Data Scientist | Industrial Machine Learning

Jakarta, ID | (+62) 82136276405 | kevinrioharris@gmail.com
[linkedin.com/in/kevinrioharristyando/](https://www.linkedin.com/in/kevinrioharristyando/) | <https://kevinrioharris.github.io/>

Professional Summary

Data Scientist who builds ML and GenAI systems that solve real industrial problems, from predictive models to autonomous agents. Delivered a real-time predictive maintenance system saving an estimated \$10K/hour in downtime, and a GenAI agent (AWS Bedrock + Databricks Genie) that automated natural-language analytics for non-technical teams. Full-stack across the ML lifecycle: PyTorch, Databricks, Airflow, FastAPI, React.

Skills

Machine Learning: PyTorch, Scikit-learn, Time Series Modeling, Anomaly Detection, Predictive Maintenance, Explainable AI (SHAP), MLOps

GenAI & Agents: AWS Bedrock, Databricks Genie, MetricViews, AI Agents

Data Engineering: Databricks, PySpark, Airflow, MLflow, PostgreSQL, MSSQL

Full Stack Development: FastAPI, React, Node.js, Docker

Analytics: Tableau, Power BI, Metabase Pro, Streamlit

Programming Languages: Python, SQL, JavaScript

Professional Experience

Asia Pacific Resources International Ltd. (APRIL) – Data Scientist

Riau, Indonesia | Sept 2025 - Present

- Built a sheet-break detection ML system (PyTorch + explainable AI) delivering 30-40 min predictive alerts, cutting downtime losses of ~\$10K/hour.
- Built PySpark ETL pipelines processing 10,000+ daily sensor records, orchestrated via Airflow.
- Configured Databricks Genie with MetricViews and built a GenAI agent using AWS Bedrock, letting non-technical stakeholders query production data in natural language and get real-time answers, cutting ad-hoc reporting requests to the data team.
- Built an integrated FastAPI + React dashboard consolidating data from multiple internal systems via APIs, replacing manual Excel workflows.
- Built supply chain analytics dashboards, reducing manual reporting by 40%.

Nomura Research Institute Indonesia – Machine Learning Annotator

Jakarta, Indonesia | Jan 2025 - Aug 2025

- Annotated 500+ bounding boxes/day for computer vision datasets using CVAT; validated YOLO predictions and refined labeling guidelines.

Selected Projects

Early Sheet Break Detection with Explainable AI

- Built and compared PyTorch neural network and XGBoost models on time-series sensor data to predict sheet breaks 30-40 minutes in advance.
- Applied SHAP for model explainability, giving operators interpretable, feature-level reasoning behind each alert instead of a black-box prediction.
- Result: enabled proactive intervention, reducing unplanned downtime losses (~\$10K/hour).

Anomaly Prediction for Equipment

- Built an LSTM Autoencoder to detect anomalies in industrial equipment sensor time-series, flagging early deviations from normal operating patterns before failure.
- Result: earlier detection of abnormal equipment behavior, supporting proactive maintenance decisions.

Hotel Booking Cancellation Prediction

- Built classification models on cancellation drivers, shipped as a Streamlit app with Tableau executive dashboards.
- Project Link: https://github.com/kevinrioharris/Hotel_Booking_Demand

Bachelor's Thesis: Fault Diagnosis for Chemical Process

- Developed PCA + Fisher Discriminant system improving detection accuracy by **13.09%**.
- Research Journal: [Fault Diagnosis Journal](#)

EDUCATION

Purwadhika Digital Technology School

Data Science & Machine Learning Digital Talent Incubator Program

Online, ID

Sept 2024 – Apr 2025

Universitas Gadjah Mada

Bachelor of Engineering, Engineering Physics

GPA: 3.27 /4.00

Yogyakarta, ID

2016 – 2022

Organization Experience

Ikatan Mahasiswa Teknologi Instrumentasi (KAMALOGIS) – Yogyakarta

Head of Media

Aug 2018 – Aug 2019

- Led the Media Division and maintained organizational communication channels.
- Launched the organization's website and managed the content database.

Staff of Media

Aug 2017 – Aug 2018

- Managed social media content and improved online engagement.
- Designed visual assets for online/offline communication.

LICENSES & CERTIFICATIONS

- Machine Learning Specialization — Stanford & DeepLearning.AI
- DeepLearning.AI TensorFlow Developer
- Google Data Analytics Professional Certificate
- Microsoft Power BI Data Analyst
- IBM Data Science Professional Certificate

Languages

Bahasa Indonesia: Native

English: Fluent (C2 EF Set Certified)

Japanese: Conversational
