

KEVIN RIO HARRISTYANDO

Data Scientist

Jakarta, ID | (+62) 82136276405 | kevinrioharris@gmail.com

[linkedin.com/in/kevinrioharistyando](https://www.linkedin.com/in/kevinrioharistyando) | kevinrioharris.github.io

PROFESSIONAL SUMMARY

Data Scientist specializing in applied ML and GenAI, with a track record of turning operational data into systems that save real money. Built a predictive maintenance model that gives operators 30 minutes of advance warning before equipment failure, preventing an estimated \$10K/hour in downtime, and shipped a GenAI agent (Microsoft Copilot Studio + Databricks Genie) that lets non-technical teams query production data and internal documents in plain English, cutting ad-hoc reporting requests to the data team. Comfortable owning the full ML lifecycle: PyTorch, Databricks/PySpark, Airflow, FastAPI, and React.

SKILLS

Machine Learning: PyTorch, Scikit-learn, Time Series Modeling, Anomaly Detection, Predictive Maintenance, Explainable AI (SHAP)

GenAI & Agents: AWS Bedrock, Databricks Genie, MetricViews, AI Agents

Data Engineering: Databricks, PySpark, Airflow, MLflow, PostgreSQL, MSSQL

Full Stack Development: FastAPI, React, Node.js

Analytics: Tableau, Power BI, Metabase Pro, Streamlit

Programming Languages: Python, SQL, JavaScript

PROFESSIONAL EXPERIENCE

Data Scientist — Asia Pacific Resources International Ltd. (APRIL)

Riau, Indonesia | Sept 2025 – Sept 2026

- Built an ML-based sheet-break detection system using PyTorch + XAI, delivering 30-minute advance warnings and helping prevent approximately US\$10K/hour in production downtime.
- Automated mill reporting pipelines using PI Web API and PI SDK, processing 10,000+ industrial sensor records daily and reducing manual data preparation.
- Deployed an automated loop-monitoring system across 4 RGE mills — APRIL, APR, Asia Symbol, and Bracell — spanning Indonesia, China, and Brazil, enabling real-time monitoring and control of production loops.
- Built a wood supply-demand dashboard with end-to-end harvesting simulation, adopted by 30+ active users across multiple departments.
- Developed GenAI agents using Copilot Studio, Databricks Genie, and AWS Bedrock for natural-language querying of documents and production data, including an agent that automated monthly reporting across 4 business units, reducing recurring ad-hoc reporting requests.
- Developed and deployed FastAPI + React applications to replace manual Excel-based workflows, reducing reporting time by 40% and enabling real-time data updates.

Machine Learning Annotator — Nomura Research Institute Indonesia

Jakarta, Indonesia | Jan 2025 – Aug 2025

- Annotated 500+ bounding boxes/day for computer vision datasets using CVAT, validated YOLO predictions and refined labeling guidelines.

SELECTED PROJECTS

Early Sheet Break Detection with Explainable AI

- Built PyTorch neural network and XGBoost models on time-series sensor data to predict sheet breaks 30 minutes in advance with Applied SHAP for model explainability, giving operators interpretable, feature-level reasoning behind each alert instead of a black-box prediction.
- Result: enabled proactive intervention, reducing unplanned downtime losses (\$10K/hour).

Anomaly Prediction for Equipment

- Built an LSTM Autoencoder to detect anomalies in industrial equipment sensor time-series, flagging early deviations from normal operating patterns before failure.
- Result: earlier detection of abnormal equipment behavior, supporting proactive maintenance decisions.

Auto Loop Monitoring System (RGE Group-Wide)

- Built an automated loop monitoring system deployed across all mills within RGE (APRIL, APR, Asia Symbol, and Bracell) spanning operations across Indonesia, China, and Brazil.
- Enabled live monitoring and control of production loops, giving operators real-time visibility across business units and countries.
- Result: standardized loop monitoring across four business units, replacing manual, mill-by-mill tracking.

Wood Supply-Demand Dashboard with Harvesting Simulation

- Built a dashboard tracking wood supply and demand end-to-end, from plantation harvesting through to mill delivery.
- Added simulation capability to forecast harvesting scenarios and supply availability.
- Result: adopted by 30 active users across multiple departments for planning and decision-making.

GenAI Reporting Agents Across Business Units

- Built GenAI agents (Copilot Studio, Databricks Genie, AWS Bedrock) enabling natural-language querying of internal documents and production data.
- Developed an AI agent automating monthly reporting across 4 business units, removing the need to manually consolidate Excel reports.
- Result: cut ad-hoc reporting requests to the data team and reduced monthly reporting time from 10 hours to just 10 minutes.

Hotel Booking Cancellation Prediction

- Built classification models on cancellation drivers, shipped as a Streamlit app with Tableau executive dashboards.
- Project Link: github.com/kevinrioharris/Hotel_Booking_Demand

Bachelor's Thesis: Fault Diagnosis for Chemical Process

- Developed PCA + Fisher Discriminant system improving detection accuracy by 13.09%.
- Research Journal: Fault Diagnosis Journal

EDUCATION

Data Science & Machine Learning DTI Program — Purwadhika Digital Technology School

Online, ID | Sept 2024 – Apr 2025

Bachelor of Engineering, Engineering Physics — Universitas Gadjah Mada

Yogyakarta, ID | 2016 – 2022

GPA: 3.27 / 4.00

ORGANIZATION EXPERIENCE

Head of Media — Ikatan Mahasiswa Teknologi Instrumentasi (KAMALOGIS) – Yogyakarta

Aug 2018 – Aug 2019

- Led the Media Division and maintained organizational communication channels.
- Launched the organization's website and managed the content database.

Staff of Media — Ikatan Mahasiswa Teknologi Instrumentasi (KAMALOGIS) – Yogyakarta

Aug 2017 – Aug 2018

- Managed social media content and improved online engagement.
- Designed visual assets for online/offline communication.

LICENSES & CERTIFICATIONS

- Machine Learning Specialization — Stanford & DeepLearning.AI
- DeepLearning.AI TensorFlow Developer
- Google Data Analytics Professional Certificate
- Microsoft Power BI Data Analyst
- IBM Data Science Professional Certificate

LANGUAGES

Bahasa Indonesia: Native

English: Fluent (C2 EF SET Certified)

Japanese: Conversational
